

Shashikar Anthoni Raj

Boston, MA | shashiantonydbz@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Northeastern University, Boston

Master of Science – Information Systems

May 2025

Relevant Coursework: Object-Oriented Design, Cloud Computing, Design Patterns, Databases, Generative AI, Data Structures & Algorithms (Teaching Assistant, INFO 6205)

National Institute of Technology, Warangal

Bachelor of Technology – Computer Science Engineering

May 2021

Relevant Coursework: Data Structures, Algorithms, Operating Systems, Computer Networks, Distributed Systems, DBMS

TECHNICAL SKILLS

Programming Languages:	Java, Python, TypeScript, JavaScript, SQL
Database Skills:	PostgreSQL, MySQL, MongoDB, Redis, Pinecone
Frameworks/Technologies:	Spring Boot, Hibernate, Kafka, React.js, Node.js, Express, FastAPI, LangGraph, LangChain, REST APIs, OAuth 2.0, JWT
Tools:	Git, GitHub, Postman, IntelliJ, VS Code, LangSmith, Jenkins
Cloud and Deployment:	AWS, GCP, Docker, Kubernetes, Terraform, CI/CD, GitHub Actions
Certifications:	AWS Solutions Architect – Associate [Verify]

EXPERIENCE

Saayam For All, San Jose, CA

Software Engineer, Microservices Team – (Java, Spring Boot, PostgreSQL, AWS, Kubernetes)

Jul 2025 – Present

- Owned volunteer onboarding end-to-end, building Spring Boot APIs and PostgreSQL schemas for multi-step workflows with sub-200ms p95 latency at 500+ active volunteers
- Engineered secure profile image uploads via AWS S3 pre-signed URLs, eliminating server-side file handling and unblocking multipart uploads up to 5MB
- Refactored CI/CD pipelines across AWS microservices, eliminating recurring merge conflicts and reducing failed deploys over 15+ releases
- Containerized microservices in Docker on Kubernetes with auto-scaling, cutting deployment from 30 minutes to under 5 and enabling same-day hotfixes

Ford Motor Company, Chennai

Software Development Engineer, E-Commerce – (Java, Spring Boot, Python, Kafka, OAuth 2.0)

Jun 2021 – Jul 2023

- Shipped payment and delivery integration microservices in Spring Boot, applying TDD and pair programming in an Agile-XP environment to lift sprint throughput by 25%
- Automated order-expiry workflows in Python with retries and alerting, eliminating 40% of manual ops and cutting data inconsistencies by 30%
- Rolled out OAuth 2.0 and JWT authentication across the payments service mesh, cutting auth-related production incidents by 40%
- Authored JUnit and Mockito test suites covering 200+ integration scenarios under a test-first approach, reducing production defects by 25%
- Defined REST API contracts with frontend engineers via OpenAPI specs, eliminating a recurring class of CORS and payload bugs during release windows
- Drove root cause analysis on 100+ production incidents across payment flows, partnering with QA to ship preventive fixes that eliminated top recurring failure modes

RELEVANT PROJECTS

Portfolio RAG Chatbot [[Demo](#)] (LangGraph, FastAPI, Pinecone, GitHub API, SendGrid)

- Architected a multi-tool LangGraph agent over portfolio content with multi-query RRF fusion and LLM reranking on Pinecone, live GitHub API exploration for repos and source files, and SqliteSaver-backed persistent conversation memory

AutoScaleLearn – AWS-Based E-Learning Submission Platform [[Demo](#)] (Spring Boot, AWS, Terraform, GitHub Actions)

- Designed Spring Boot APIs and provisioned AWS infrastructure (VPC, EC2, RDS, IAM, SQS/SNS, Lambda, API Gateway) via Terraform, with GitHub Actions CI/CD, CloudWatch alerting, and autoscaling to handle traffic spikes without downtime

EventSphere – Geo-Aware Community Marketplace [[Demo](#)] (React, TypeScript, Node.js, Express, MongoDB)

- Developed a full-stack marketplace with React/TypeScript and Node.js/Express/MongoDB, supporting zipcode-scoped feeds with Mapbox, Stripe, and OpenWeatherMap integrations
